With its business operations going back to 1993, the VicPlas Group was listed on the SGX SESDAQ on 22 April 1999.

Over the years, the Group has evolved to include two core businesses:

- The manufacturing of innovative medical devices through our now wholly owned subsidiary Forefront Medical Technology (Pte) Ltd (FMT).

- The manufacturing and distribution of proprietary plastic building products, including uPVC pipes, pipe fittings and electrical conduits. All our products are marketed under the VicPlas brand and serve primarily customers in Singapore and Malaysia.

FMT is involved in the research, design, development and distribution of innovative medical devices. FMT is the only local manufacturer of cutting-edge products such as the Laryngeal Mask Airway, a device used in anaesthetic procedures. Since its inception in 2000, FMT has achieved quality certifications such as ISO9001: 2000, ISO13488: 1996, EN46002: 1996 and ISO13485: 2003. FMT also operates a Quality Management System that is in compliance with Federal Drug Administration requirements.

On 1 August 2007, VicPlas acquired the remaining 50% stake in FMT, making it a wholly owned subsidiary. The acquisition of FMT places the Group in an ideal position to capitalise on the growth potential of the vast global medical devices market.
